Data Validity Considerations

Daily data is updated throughout the day. Today's data can be yesterday ! Regional considerations

Data refreshes, when Excel file is first opened. Can be manually refreshed by a Refresh All in Excel. In the morning UK time, there is no European data for Today. Late afternoon for Asia, Today's data becomes Yesterdays data

Inconsistency of data. Inconsistency or reporting my countries. Regional considerations

Many countries only include data where people have been hospitalised. In many cases, non Hospital Deaths have not been included in the numbers or only included from a certain date.

Countries appearing in weird continents Regional and sovereign considerations

Hierarchy is Continent -> Country -> Province/Region. Some countries appear in two continents e.g UK -> Europe but also UK -> South America as the Falkland Islands are a UK country just off Argentina

Vessel is a pseudo continent Regional and sovereign considerations

There were two vessels at sea when outbreaks of Corona virus occurred. These are catalogued as two separate countries
