

EiB Analytics adds real value to your data, to deliver insights and intelligence which you never previously knew existed...

EiB Analytics is a single, visual MI platform for developing analytical reporting applications. Handling real-world data and business logic requirements, without the complexities or the costs of standard BI tools, EiB Analytics dynamically transforms your disparate data into quick and assured ROI.

Delivering a range of exciting new features across the platform, which are guaranteed to improve the analytic experience for the whole spectrum of stakeholders, from your Board of Directors and I.T. department to Business Analysts and MI Managers alike, EiB Analytics is one of the most complete MI reporting application on the open market.

KEY FEATURES

- Train of Thought Analysis...**
 In a business landscape which is full of data, and strategies to get value from that data, there is still room for basic human creativity, and using the brain to follow hunches and explore a 'train of thought'.
- Seamless integration with Microsoft Power BI...**
 The best mobile and web data dashboard visualisation experience on the Market.
- Customisable User Interface...**
 Calibrate your EiB Analytics environment to suit the needs of the organisation and your users.
- Enhanced Budgeting & Forecasting Capabilities...**
 No more manual repetition. Much more modelling future performance.
- Fully Secure & GDPR Compliant...**
 Complete peace of mind that your compliance risks are being managed and appropriate mitigation is in-place, ensuring your data doesn't become a liability rather than a competitive edge.

Modernising how you collaborate and scale analytics across your organisation, find and connect to data, and ultimately drive business-changing insights, are just a few of the fundamental objectives which our development team have been working hard to achieve with the solution.

Whether you need to identify and correct bad data, automate reporting processes into a matter of minutes, which traditionally take you days if not weeks, or simply want to consolidate all your unstructured data sources into one centralised environment for ad-hoc analyses, EiB Analytics can do all of the above, and much more...

Natively integrating with Microsoft Power BI, empowering your business to leverage cause and effect intelligence, and instantaneously explore correlations in your data which you never knew existed, is another powerful feature of EiB Analytics.

Deployable on all devices, including iOS, Android, desktop, web, tablets and mobile, the solution's seamless integration with PowerBI provides you with a quick, easy and intuitive platform for addressing all your business' MI requirements at the click of a button.

So, what are you waiting for?

Contact sales@excelinbusiness.com or visit www.excelinbusiness.com to download further collateral, arrange an online demonstration, or simply view one of our videos.

Online demonstrations will take about 1 hour and you don't even have to leave your office.
