

Think delivering global, business intelligence, management reporting and data visualisation applications from within Excel is just a dream?

We think it's just the starting point with **EiB Financial Analytics for ShipNet**

**EiB Financial Analytics for ShipNet** delivers the very best in Financial Reporting from your ShipNet Accounting system (SNACs), offering fully integrated Reporting, Dashboards and Forecasting analyses.

Dramatically reduce period end timescales for Management Accounts production, whilst increasing accuracy, flexibility and auditability of all your financial information.

Eliminate the business risks of manual spreadsheets for data collation, plus remove unnecessary costs and dependencies on key personnel. Simply measure your business performance effectively each and every period...**All without leaving Excel.**

### KEY FEATURES

- P&L, Balance Sheet, Voyage Profitability Reports in minutes. Short implementations.
- Optimised integration with the ShipNet Accounting System.
- Chart of accounts can be derived from your ShipNet Accounting System or remapped for further reports and analyses.
- Full multi company, multi vessel and multi-currency support.
- Integrated Excel based Forecasting analysis with effectively unlimited versions for comparisons to Actual and Budget.
- Full drill through auditing back to underlying transactional information.
- Scheduled report automation for emailing of offline reports to users with no access to the central server.
- Full mobile deployment of all Reports and Dashboards to iOS, Android and WP devices via Windows Terminal Services or Citrix.

Drill-down to any level of detail and then double click on any number to obtain a full audit of all the transactions behind it.

All financial reports and dashboards can be dynamically changed and viewed by any combination of defined segments e.g. Unit (Company), Ships, Voyages, Time, Version (Act, Bud, Fcst) etc., coupled with Base or Local Currencies throughout your chart of accounts for any and all periods over the last five years. Contrast mixed Act v Bud v Fcst reports with ease.

For more complex and larger implementations, EIB Financial Analytics easily handles multi-Unit (Company) applications with a full audit trail from any level in your chart of accounts back to the original transactions in SNACS. Total auditability, without leaving Excel.

Load any number of Forecast versions from external files, or from the SNACS Accounting System itself.

In short, automate your entire SNACS Financial Management without any of the usual costs and the numerous days taken to collate, consolidate and present period end information

### So, what are you waiting for?

Contact [sales@excelinbusiness.com](mailto:sales@excelinbusiness.com) or visit [www.excelinbusiness.com](http://www.excelinbusiness.com) to download further collateral, arrange an online demonstration, or simply view one of our videos.

Online demonstrations will take about 1 hour and you don't even have to leave your office.
